PROGRESS ASSESSMENT OF <MONTH, YEAR>

STUDENT ID#:	
COURSE CODE:	**INFO 0211**
COURSE NAME:	**WEB DESIGN**
LECTURER:	**KERRY-ANN XAVIER**
PROGRAMME NAME:	**ADISM**
RELEASE DATE:	**2ND MARCH 2026**
DUE DATE:	**3RD APRIL 2026**
INSTRUCTIONS TO CANDIDATES:	✓ Complete ALL Sections within this paper ✓ Submit the completed work to the provided Canvas assignment as a single zipped website folder (for Section 1) AND a PDF report document (for Section 2). ✓ The score earned out of 100 points is worth 40% of the course grade ✓ Carefully read and follow all instructions provided within.
This assessment has **(10)** pages *(inclusive of cover page)* and **(2)** sections.	

SECTION 1 – Website Development **[Total Marks – 75]**

You must now fully develop and launch the multi-page website based on:

- Your design concepts from Assignment 1
- Your technical decisions, CMS/hosting recommendations, and Style Guide from Assignment 2

Your task is to produce a functional, accessible, and professional website for your chosen company.

1. **Required Website Pages**

   Using HTML, CSS, and JavaScript, develop the following pages. All pages must follow your Assignment 2 Style Guide for consistency.

   a. **Home Page (Landing Page)**
      - Introduce the company
      - Highlight key products/services
      - Incorporate at least two Call-to-Action elements

   b. **About Us Page**
      - Company history
      - Mission & vision
      - Team member profiles (use real or placeholder images)

   c. **Products and/or Services Page(s)**
      - Offer detailed descriptions
      - Categorize services/products for clarity
      - Use grids, cards, or sections for visual clarity

   d. **Functional User Input Form Page**

      Examples include:
      - Newsletter sign-up
      - Membership registration
      - Request-a-quote form
      - Feedback/comment submission form

      JavaScript validation is required (in addition to HTML5 validation).

e. **Contact Us / Locations Page**
   - Map (optional)
   - Operating hours
   - Branch locations (if applicable)
   - Contact details

2. Website Development Requirements

The site **must** demonstrate the following:

a. **Call to Action (CTA)**
   - Buttons or banners prompting users: “Buy Now”, “Subscribe”, “Learn More”, etc.

b. **Accessibility (W3C Standard)**
   - Provide 5 accessibility features such as:
     - Alt text for images
     - Sufficient color contrast
     - Semantic HTML
     - ARIA labels
     - Keyboard navigability
   - Include W3C validation evidence (screenshot or report)

c. **CSS Application**
   - Use external CSS
   - Demonstrate layout design:
     - Flexbox
     - Grid
     - Responsive font sizing
   - Maintain consistent styling per your Style Guide

d. **Graphics & Media**
   - Use high-quality, optimized images
   - Optional features: sliders, icons, interactive visuals
   - Ensure images scale correctly on all devices

e. **Responsiveness**
   - Site must be readable and functional on:

- Desktop
- Tablet
- Smartphone

f. Cross-Browser Compatibility

Test on three major browsers, (Show results in Section 2 Report) for example:

- Chrome
- Firefox
- Edge

g. JavaScript Validation

Your user form must show:

- Required fields
- Pattern/format validation (email, phone, etc.)
- Custom error messages (not only default HTML5)

SECTION 2 – Report **[25 marks]**

Your report expands on the work from Assignments 1 and 2 by documenting your implementation, testing, hosting, and reflections.

1. Introduction

Include (from Assignment 1):

- Brief overview of your chosen business
- Purpose and goals of the website

2. Website Implementation Section

This section must include (from Assignment 1):

a. Purpose & Type of Website

E-commerce? Informational? Portfolio? Service-based?

b. Intended Audience

Who is it built for based on demographics/needs?

c. Website Page Illustrations

Screenshots of each page with explanations:

- Describe layout choices

- Identify where you applied the five accessibility guidelines
- Show how you followed your Style Guide

d. Website Hosting URL

You must **publish the website live**.

Accepted free hosting options now include (in addition to those listed in the brief):

- Netlify
- GitHub Pages
- Google Cloud Static Web etc.

Provide:

- Live URL
- Hosting screenshots
- Hosting notes (if required)

3. Test Plan (Required)

Your test plan must include actual testing evidence conducted on the hosted site, not local files. Show:

a. Navigation & Link Testing

Check logos, menus, and internal/external links

b. Cross-Browser Testing

Test and include screenshots from at least three browsers.

c. Responsiveness Testing

Provide results for:

- Desktop
- Laptop
- Tablet
- Mobile

a. Form Validation Testing

Document tests for:

- Required fields
- Incorrect format
- Successful submission (or error-handling)

Include a test tables – **a sample will be provided**.

4. Maintenance Plan

Outline a future-ready plan that addresses:

- Security updates
- Content updates
- Backups
- Optimization
- SEO upkeep
- Link checking
- Accessibility re-evaluation

5. Reflection (Clear Requirements)

Discuss:

a. **Challenges**

   Technical or design related.

b. **Lessons Learned**

   Connect specifically to Assignments 1 and 2:

   - Ideation vs. implementation
   - Growth in HTML/CSS
   - First experience using JavaScript
   - Understanding hosting and deployment

c. **Future Enhancements**

   Justify how additional features could benefit the business—for example:

   - Adding e-commerce
   - Improving SEO
   - Integrating a CMS (based on Assignment 2)
   - Implementing analytics

Submission Requirements

You must submit **three components**:

1. The Full Website (Zipped Folder)

Include:

- All HTML pages
- CSS files
- JavaScript files
- Images
- External asset folders
- README (optional)

2. PDF Report

Named: **[Student_Nname Student ID#] INFO 0211 – Final Project**

Must follow the structure from Section 2 of the assessment brief.

3. Live Hosted Website URL

Must be included clearly in your report.

Criteria	Excellent	Proficient	Average	Poor
Website Implementation **(20 Marks)**	**(18-20)** Completeness of the implementation of website – all requirements have been executed to an excellent standard – no issues identified. All required pages implemented. Exceptional work.	**(15-17)** Most requirements have been implemented to a good standard. A few minor issues identified. Good work.	**(10-14)** Some of the requirements have been implemented to a good standard. Some issues missing or some website functions do not work as intended. Fair attempt noted.	**(0-9)** Very little to no implementation of requirements. Or… there was some attempt at implementation but are incomplete.
Design Creativity, Aesthetic and Consistency **(15 Marks)**	**(13-15)** Excellent layout and design aesthetic. Planning was well thought out and executed. Exceptional work – colours, visuals, graphics and multimedia have been incorporated and used for high visual appeal. Excellent consideration of company branding, target audience.	**(10-12)** Good layout and design aesthetic. Very minor issues may be noted – slips in the consistency, multimedia generally good, but slight improvements could be made. Good work.	**(7-9)** Layout and design aesthetic are fair. Some possible things to note: additional graphics/multi-media could have been used for more engagement. Colour choices could be more complementary, etc. Fair attempt noted.	**(0-6)** Very little to no design creativity / aesthetic layout. Pages may not incorporate colour or background. Very little application of CSS to change default browser typography settings and colours. Very minimal use of multi-media
User Interaction and Navigation **(10 Marks)**	**(9-10)** Website incorporates a very good range of interactive elements to enhance user engagement – hover effects, subtle animations, appropriate Call to Action buttons for prompting, and other creative features. Links function as they should – no broken links noted.	**(7-8)** Good range of interactive elements used. May have missed opportunities to incorporate some a few instances. Few issues with navigation noted	**(5-6)** Fair range of interactive elements used. Could have incorporated a bit more to foster more user interactivity and engagement with the website. Some issues with navigation noted.	**(0-4)** Very little to no implementation of interactive elements. Site is not interactive and engaging. Major navigational issues noted.
Responsiveness and Cross Browser Compatibility **(10 Marks)**	**(9-10)** Website is responsive to different types of devices and operates seamlessly across major browsers	**(7-8)** Website is mostly responsive. May see very few issues with navigational elements or images not adapting to differently sized devices.	**(5-6)** Website somewhat responsive. Some rectifications need to be made to some elements to facilitate a more responsive design.	**(0-4)** Very little to no application of a responsive design

Criteria	Excellent	Proficient	Average	Poor
Accessibility **(5 Marks)**	**(5)** Very good incorporation of Usability and accessibility guidelines within development. Site should have a minimum of 5 noted guidelines evident.	**(4)** Good incorporation of Usability and accessibility guidelines within development. Site may have a minimum of 4 noted guidelines evident.	**(3)** Fair incorporation of Usability and accessibility guidelines within development. Site may have a minimum of 3 noted guidelines evident.	**(0-2)** Very little to no application of usability and accessibility guidelines
Website Hosting **(5 Marks)**	**(5)** Website assets have been hosted with a chosen Web hosting service. URL address provided links directly to hosted website.	**(4)** URL Address provided but may have few issues with how the site loads. Evidence to support attempts at hosting must be provided.	**(3)** URL address provided but most elements may not be functional e.g. carousel does not work, or images do not display… Must show evidence to support attempts made.	**(0-2)** Website has not been hosted. No URL address provided for a hosted site.
Input Form and Validation **(10 Marks)**	**(9-10)** Input forms incorporate a very good range of appropriate controls to prevent user input errors. Design of the form is efficient. Mandatory fields are highlighted. Input is validated to prevent errors.	**(7-8)** Input form incorporates a good range of appropriate controls to prevent user input errors. Design of the form is good, could have a few improvements. Most input is validated to prevent errors.	**(5-6)** Input form incorporates a fair range of appropriate controls to prevent user input errors. Design of the form is fair, room for some improvements. Some input is validated to prevent errors	**(0-4)** Very little to no evidence of a proper input form. Form may use only text fields for typed data entry. Fields have not been validated in any way or form. Only inbuilt HTML5 validation used.
Test Plan **(10 Marks)**	**(9-10)** A very comprehensive and thorough test plan documented. Evidence of tests performed, and their results have be documented clearly.	**(7-8)** Most testing performed and documented. Some gaps in the testing can be seen.	**(5-6)** Some testing performed and documented. Requires improvement	**(0-4)** Very little to no testing of the website is evident.
Maintenance Plan **(10 Marks)**	**(9-10)** A very comprehensive and thorough maintenance plan documented. Excellent considerations for maintaining	**(7-8)** Good attempt at outlining website maintenance procedures. May have very few gaps	**(5-6)** Fair attempt. Could elaborate on some tasks. May miss the chance to address some operational performance OR security OR usability requirements	**(0-4)** Maintenance plan is severely under-developed (1-3) OR Entirely missing (0).

Criteria	Excellent	Proficient	Average	Poor
	operational performance, security, and usability			
Report Format **(5 Marks)**	**(5)** Report formatted to a very good standard – appropriate sectioning, formatting and presentation. Contains sufficient images, annotations, and/or tables to aid readability and comprehension. Writing style is clear and professional.	**(4)** Report formatted to a good standard. Sections are generally complete but could strive for more detail. Minimal spelling and grammatical errors noted.	**(3)** Report formatted to a fair standard. Some gaps noted. Could be more complete. Some spelling/grammatical issues noted.	**(0-2)** Chosen format is inappropriate, or content is mostly deficient. Writing style is unprofessional – contains numerous spelling/grammatical errors.
